# AEZ ALLOY WHEEL PRODUCTION

## AEZ - QUALITÄT FÜR DIE WIR UNS VERBÜRGEN ALUFELGEN: WORAN MAN QUALITÄT ERKENNT

Hohe Qualität ist nicht nur eine Frage der Optik, sondern vor allem der Sicherheit. Das gilt besonders für Kunden von AEZ, die zu Recht hohe Ansprüche haben. Doch wie erkennt der Käufer, ob er ein Qualitätsprodukt oder nicht vielmehr die Katze im Sack kauft?

- AEZ Leichtmetallräder durchlaufen in der Produktion ein bis zu zehnstufiges Kontrollverfahren, beginnend von der Prüfung des Rohmaterials über Röntgen- und Biege-Umlauftests bis hin zum tagelangen Bad in ätzenden Dämpfen.
- Spezialisten, wie AEZ Leichtmetallräder, setzen zusätzlich 3 D-Messmaschinen und Helium-Dichtigkeitskontrollen ein.
- Sicherheitsrelevante Prüfungen (Rohmaterial, Röntgen, Maßhaltigkeit) werden auf jedes einzelne, produzierte Rad angewandt. Das ist – außer bei AEZ – nur bei den allerwenigsten Felgenre Herstellern der Fall.
- Der Käufer findet das Gütezeichen „Made in Germany“ eingegossen auf der Innenseite jeder AEZ Felge. Und NUR DANN hat er es mit einem Qualitätsrad aus Deutschland zu tun. Im Werk der AEZ Produktion in Neuenrade fertigt das Unternehmen Leichtmetallräder auf dem letzten Stand der Technik. Das bedeutet hoch automatisierte Produktion, vom Guss bis zur Lackierung. Wir verpflichten uns zur Innovation im Design und zu modernster Produktionstechnologie.

## AEZ - QUALITY WE BUILD OUR REPUTATION ON ALLOY WHEELS: HOW TO RECOGNISE QUALITY

High quality is not just a question of looks, but primarily safety. This applies especially to AEZ customers who demand more, and rightly so. But how can buyers tell if they're getting a quality product or something that just looks like it?

- AEZ alloy wheels go through a 10-step quality control programme, beginning from testing the raw materials, including x-ray and strength testing, and subjecting the wheel for days to caustic fumes.
- Specialists, like AEZ Leichtmetallräder, use additional 3-D measurement machines and helium density tests.
- Safety tests (raw materials, x-ray, and dimensional accuracy) are carried out on each individual wheel. Very few wheel manufacturers – with the exception of AEZ, of course – do this for every wheel.
- The quality stamp “Made in Germany” is cast on the inside of each AEZ wheel. And ONLY THEN does that mean our customers are getting a quality wheel from Germany. At the AEZ production plant in Neuenrade the company manufactures cutting-edge alloy wheels. This means highly automated production processes, from casting to finishing. We have staked our reputation on pursuing innovation in design and modern manufacturing technology.

iPad

## INFORMATION & ENTERTAINMENT AEZ MAGAZINE & CONFIGURATOR APP

### AEZ MAGAZINE APP

The newest wheels of the season, the newest AEZ-Bond movies or many more news from the AEZ- world. Get all of that on your mobile devices.

### AEZ CONFIGURATOR APP 4.0

Your Mobile wardrobe: The AEZ Configurator is the mobile dressing room for your car!

#### HOW IT WORKS:

Start AEZ app - Configurator - select your car or take a picture of your car - choose your desired wheel design - READY

... if you want to know where you can buy these wheels, select „dealer“ and the nearest dealer is displayed immediately.

#### SPECIAL FEATURE:

Your personal Car „Butler“ will remind you so you will not miss important dates!
